

# UNLEASH YOUR INFERNO

🔥 An Ecosystem is a group of interconnected elements, a community environment where cooperation is necessary to sustain (life) groups!

🔥 The environment (i.e., nature) influences the behavior of cells without changing their genetic code.

## Application Question/Activity:

1. Describe in detail your Ecosystem as it relates to your family, community or work life.

2. Who is your me/we/us tribe, and what influence do they have on your behavior?

3. Begin to define your desires or goals in each area of your Ecosystem.
